Abstract (en)

[origin: WO2021032617A1] An aspect of the invention relates to a system (100) for remote reproduction of digital audio data, comprising at least one digital audio receiver (102) and one digital audio broadcaster (101), the digital audio broadcaster (101) being configured to transmit the digital audio data in the form of frames to the digital audio receiver (102), the digital audio receiver (102) being configured to reproduce the digital audio data from the frames, the digital audio broadcaster (101) and the digital audio receiver (102) being connected via at least one first (103) and one second wireless link (104) and the digital audio broadcaster (101) simultaneously transmitting a first set of frames via the first wireless link (103) and a second set of frames via the second wireless link (104).
