Abstract (en)
[origin: EP4018846A1] A pouched product (1) for oral use comprising a liquid permeable cover material (2) and a portion sized amount of a filling material (3) comprising a first type of particles (4), the filling material (3) being enclosed by the liquid permeable cover material (2), the pouched product (1) having a first main surface (8) and a second main surface (9) and a thickness between the first main surface (8) and the second main surface (8). The particles of the first type of particles (4) have an average particle size within the range of from 0.3 mm to 3.0 mm and a pre-use moisture content of from 1% by weight of the filling material (3) to 35% by weight of the filling material (3), that the first type of particles (4) are water insoluble particles and that the filling material (3) comprises one or more water soluble components (11), the pouched product (1) having a pre-use thickness (t1) and a post-use thickness (t2) and a ratio (t2/t1) between the post-use thickness (t2) and the pre-use thickness (t1) being in the range of from 0.9 to 1.3.
