Abstract (en)

[origin: CN114657687A] The invention relates to a knitting machine or knitting machine having at least one thread guide (100) which can be moved along a thread guide rail (101) and which has a thread guide arm (120), at the lower end of which a thread guide (4) is arranged, the thread guide (4) having one or more thread feeding elements (41) for feeding a thread to a knitting needle of the flat knitting machine, and wherein the thread feeding elements (41) are arranged at the lower end of the thread guide arm (120). A protective housing (5) is provided for covering one or more yarn feeding parts (41) of the yarn guide (4).
