Abstract (en)

[origin: EP4019849A1] The invention relates to a method for controlling a cooking hob and to a cooking hob. In the method, instructions are programmed and validated in a portable device (2); a pairing is established between the cooking hob (1) and the portable device (2); a pairing established notification in the cooking hob (1) is output; the instructions validated in the portable device (2) are requested, by means of the user acting on the cooking hob (1), after outputting the pairing established notification; the instructions validated in the portable device (2) are automatically transmitted to said cooking hob (1) after receiving the instruction request in said portable device (2); and the received instructions are automatically executed in the cooking hob (1).
