Abstract (en)

[origin: US2022197221A1] A notching system (100) including a spring (1) having a first including n first teeth (11a, 12a) a first member (2) having a second toothset including m second teeth (22a, 22b), and a second member (3) mounted so as to be movable, in particular mounted so as to be rotatable, with respect to the first member (2), the first and second toothsets being arranged such that, through their interactions, they define p notches or indexed positions, the spring (1) including at least two elastic arms (11, 12), and at least one first pivot connection element (1b) between said two elastic arms (11, 12), the second member including at least one second pivot connection element (3b) cooperating with the at least one first pivot connection element (1b) in order to create at least one pivot connection between the spring (1) and the second member (3).

Abstract (fr)

Système de crantage (100) comprenant :- un ressort (1) incluant une première denture comprenant n premières dents (11a, 12a),- un premier organe (2) incluant une deuxième denture comprenant m deuxièmes dents (22a, 22b), et- un deuxième organe (3) monté mobile, notamment monté mobile en rotation, par rapport au premier organe (2),les première et deuxième dentures étant agencées de sorte que, par leurs interactions, elles définissent p crans ou positions indexées,le ressort (1) comprenant :- au moins deux bras élastiques (11, 12), et- au moins un premier élément de liaison pivot (1b) entre lesdits deux bras élastiques (11, 12),le deuxième organe comprenant au moins un deuxième élément de liaison pivot (3b) coopérant avec l'au moins un premier élément de liaison pivot (1b) pour créer au moins une liaison pivot entre le ressort (1) et le deuxième organe (3).
