Abstract (en)
Provided is a golf swing analysis system, a golf swing analysis method, and a program enabling a player to easily grasp whether the player has made a correct swing. A captured video image obtaining unit (70) obtains a captured video image in which a player making a golf swing is captured. A swing path type specifying unit (86) specifies at least one reference angle based on at least one of a position of a predetermined body part of the player at address or a position of a shaft at address, where the positions are specified based on the captured video image. A swing path type specifying unit (86) specifies a downswing angle of a club head captured in a captured video image based on the captured video image. The swing path type specifying unit (86) compares the reference angle with the downswing angle.
