Abstract (en)

A method for wireless control of a controlled device (DVC1), comprising the following steps, performed by the controlled device (DVC1) :receiving (S1) a command (Cd_x) from a control device (UE1) via a wireless communication;transmitting (S30) an audio signal (S) carrying a first validation code (K1), receiving a second validation code (K2) via the wireless communication;verifying that the second validation code (K2) comprises the first validation code (K1) and, in a positive event, executing (S4) the command (Cd_x) from said control device.
