Abstract (en)

[origin: WO2021037997A1] The present invention relates to a self-foaming, protein-free creamer composition comprising the following food-approved components: (a) a vegetable fat, (b) a carbohydrate, preferably a vegetable carbohydrate; (c) a modified starch having a higher hydrophobicity than native starch, (d) a low molecular weight surfactant with a molecular weight less than 800 g/mol, selected from one or more monoglycerides, diglycerides, and their esters, and (e) a gas, as well as to a method of preparing such a self-foaming creamer composition. Moreover, the present invention relates to a dairy-free creamer composition. The present invention further relates to a method of preparing a foaming beverage, and to a foaming beverage.
