Abstract (en)
[origin: WO2021037504A1] A device for fixing a drawer (1) on a rail (4) of a pull-out guide comprises a drawer (1), a fastening means (5), which is secured on a rail (4), and a receiving element (10, 20, 30, 40, 50, 60), which is retained on the drawer (1) and over which the fastening means (5) engages at least to some extent, wherein the receiving element (10, 20, 30, 40, 50, 60) is retained in a movable manner on the drawer (1) and is prestressed in the direction of the fastening means (5). This makes it possible to avoid the situation where the drawer is lifted off, even in the presence of production tolerances.
