Abstract (en)

[origin: WO2021037862A1] This invention relates to a holder for mounting a liquid dispenser onto a wall, comprising a wall bracket and a fixation bracket. The wall bracket is configured to be attached to the wall, and comprises a first support portion protruding from the front side. The wall bracket and the fixation bracket further comprise fixation parts configured for attaching the fixation bracket onto the wall bracket. The fixation bracket further comprises a second support portion protruding from a side. The first and the second support portions are configured to jointly provide support for the liquid dispenser, and at least one of the support portions is provided with a through hole. An upper portion of the wall bracket is provided with at least one protrusion extending outwards from the front side, the protrusion being configured to provide an outward directed force onto the fixation bracket, such that the fixation parts are pushed together, attaching the fixation bracket to the wall bracket.
