Abstract (en)

[origin: WO2021038141A1] The present invention concerns a wiping material dispenser (1) in the form of a spool (B) from which the material can be unwound in a strip, the dispenser (1) comprising a housing (10) and a cutting system (20) for cutting the strip pulled manually by a user, characterised in that the cutting system (20) comprises a flexible blade (30) and at least one tooth (40) mounted on a front side (17) of the housing (10), and in that the flexible blade (30) comprises at least one slot (31) positioned opposite the at least one tooth (40), and in that the flexible blade (30) can be deformed under the pressure of the strip, when a user pulls on the strip from the front side (17) of the housing (10), so that the at least one tooth (40) protrudes through the at least one slot (31), comes into contact with the strip pressed onto the flexible blade (30) and tears the strip at a pre-cut line.
