Abstract (en)

[origin: WO2021038601A1] The present invention relates to a liquid compositions for the oral and parenteral administration of melatonin in the form of aqueous solutions comprising melatonin and at least one but preferably two ingredients for enhancing properties of the composition wherein the ingredient(s) belong to the group consisting of solubilizers, polymeric solubilizers, crystal inhibitors, stabilizers, anti-oxidants, chelating agent and complexing agent and combinations thereof and the properties enhanced are at least solubility and stability. Preferably the compositions are pharmaceutical compositions. Preferably, the compositions are nutraceutical compositions.
