Abstract (en)

[origin: WO2021041608A1] A multi-drug delivery system includes a first capsule including a first capsule body that includes a first interior, and a first tablet and a second tablet within the first interior. The first tablet includes a first drug, and the second tablet includes at least a second drug different from the first drug. The first tablet and the second tablet are configured for simultaneous release upon dissolution of the first capsule body within a patient. The system also includes a second capsule including a second capsule body that includes a second interior, and a third tablet within the second interior. The third tablet includes the first drug.
