Abstract (en)
[origin: WO2021038081A1] The invention relates to a fastening system. The invention further relates to a fastening system for a facade element. Furthermore, the invention relates to the use of the fastening system for fastening a facade element in a facade system. The claimed fastening system comprises a support profile and a fastening shell and is characterised in that the fastening system also comprises a fastening element. The support profile can be fixed to a building wall. The fastening shell can be fastened to the support profile by means of the fastening element. The fastening shell may be designed to accommodate a facade element.
