Abstract (en)

[origin: WO2021037979A1] A Cold Storage System comprises: a compressor (12) for compressing and enabling a circulation of a heat transfer fluid (HTF); a condenser (13) with condenser unit (131) for cooling the compressed HTF and an expansion unit (132) for decreasing the pressure of the HTF, thereby further cooling the HTF; and a cold storage (14) with an integrated evaporator (145), the cold storage (14) is configure to store the coldness transferred by the HTF.
