Abstract (en)

[origin: EP4023089A1] Provided is a battery unit for an aerosol generation device that generates aerosol, the battery unit comprising: a communication unit (108) that performs wireless communication between the aerosol generation device and a user terminal (2); and a control unit (106) that determines the connection status between the battery unit and a cartridge equipped with an atomization unit (118) that atomizes an aerosol source. The control unit (106) controls the wireless communication on the basis of the connection status. Accordingly, the consumption of a battery (110), with which the aerosol generation device is equipped, can be reduced.
