Abstract (en)
A device 200 is disclosed for holding a beverage container 216 having any size within a range of sizes. The holder 200 has a side wall 202 defining an opening 208 through which the beverage container is insertable and a base 204. A collar 210 is positioned within the opening 208, and the side wall 202 and the base 204 together define a cavity 214 for receiving the beverage container 216. The collar 210 is pliable and is arranged to deform to contact and grip the beverage container 216. The opening 208 has a first width and the collar 210 has an aperture 212 formed therein, the aperture 212 having a second width, the first and second widths being selected to adapt the device to the desired range of sizes.
