Abstract (en)
[origin: EP4023405A1] The invention relates to a mould (2), a system and method for manufacturing a floor part or a wall part with a sandwich structure. The mould (2) comprises:- a number of lower base mould elements (4), wherein the number of lower base mould elements (4) can be placed mutually adjacently on a base (6) for the floor part or the wall part for the purpose of forming a periphery for a first concrete layer (14);- a first layer of auxiliary mould elements (10), wherein the number of auxiliary mould elements (10) can be placed mutually adjacently on the number of lower base mould elements (4) for the purpose of forming a periphery for an insulating layer (16) and/or second concrete layer (18) arranged above the first concrete layer (14).
