Abstract (en)
[origin: EP4023835A1] The roof window system (1) comprises at least two window units (11, 12) configured to be built in side by side, separated by a pre-defined spacing (SP), in a roof structure (2) of a roof, in particular comprising an inclined roof surface, each window unit (11, 12) comprising a top member (111, 121), two side members (112, 113, 122, 123), and a bottom member (114, 124), said roof window system (1) furthermore comprising a cover assembly spanning the spacing (SP) between facing side members (113, 122) of neighbouring window units (11, 12) in the mounted condition of the roof window system (1). The cover assembly comprises a set of receiver brackets (7) configured to be connected to the facing side members (113, 122) of neighbouring window units (11, 12) and a cover plate (8) configured to be brought into releasable engagement with the set of receiver brackets (7).
