Abstract (en)
A theme switching method and a theme switching apparatus are provided. The method is applied to a terminal device. The method includes: obtaining a switching parameter when a theme switching operation is detected (S201); determining a to-be-enabled theme object based on the switching parameter, where the to-be-enabled theme object is in a loaded state (S202); and switching a theme object of the terminal device to the to-be-enabled theme object (S203). The method and the apparatus help improve theme switching efficiency of the terminal device.
