Abstract (en)

[origin: WO2021043615A1] A device (1) for applying a cosmetic composition (C), in particular a makeup or care composition, to an application zone (P) of a user, having a positioning system (2) comprising at least one support (4) configured to be positioned on a predefined supporting zone (Z) of the user's body and at least one connecting member (5) connected to an application system (3) for the composition, the support (4) having a customized shape, adapted to said supporting zone, and/or the connecting member (5) having a customized shape and/or dimensions, adapted to the morphology of the user, the device being configured to guide the connecting member (5), in particular to impose a predefined trajectory on said connecting member, when the latter is moved relative to said supporting zone (Z) from a position in which the support (4) is positioned on said zone, in order to bring the application system (3) into contact with said application zone.
