Abstract (en)

[origin: WO2021043445A1] The invention relates to a pressing tool (51) which has a structured pressing surface (52) which is provided to produce, by pressing, a workpiece (1) having a structured surface (2). At least one region (53) of the pressing surface (52) has a peg-like and/or rod-like structure (54) with pegs and/or rods (54a-54d) protruding from the pressing surface (52). The invention also relates to a workpiece (1) which comprises a structured surface (2). At least one region (3) of the structured surface (2) comprises crater-like recesses (4) in the structured surface (2), in order to confer a relatively matte impression on this region (3).
