Abstract (en)

[origin: WO2021044293A1] A vehicle (10), in particular of the cycling type, especially consisting in a bicycle, and preferentially in the form of a mountain bike, a city bike, or the like, comprising a support frame (12), front (14) and rear (16), respectively, wheel means, and steering means (18), in particular in the form of a respective handlebar, in particular comprising a respective steering control shaft (180) and suitably connected to said front wheel means (14). Said front wheel means (14) comprise a first (141) and a second (142) wheels, which are side-by-side to one another and supported by respective first and second struts (143, 144). Articulated connecting means (20) are provided between said steering means (18), or handlebar, and said first and second front wheels, in particular arranged between said steering control shaft (180) and said first and second struts (143, 144) for supporting said first and said second front wheels (141, 142), and wherein means (22) are further provided for connecting said articulated connecting means (20) to said support frame of the vehicle (12).
