Abstract (en)

[origin: WO2021043760A2] The invention relates to a transport container (4) for a sorting device (1), which can be moved along a conveying path (2), comprising a support frame (6), wherein at least one support tray (8, 10) is rotatably mounted on the support frame, in particular a first support tray (8) and a second support tray (10) following the first support tray (8) in the conveying direction (A) of the transport container (4), wherein the at least one support tray (8, 10) can be rotationally moved by a control device (12) between a substantially horizontal transport position (P1) for transporting a load (L) and a substantially vertical tilt position (P2) for depositing the load (L), wherein the control device (12) has a control lever (14, 16) connected to the support tray, in particular a first control lever (14) connected to the first support tray (8) and a second control lever (16) connected to the second support tray (10), wherein the control lever (14, 16), in particular the respective first control lever (14) and/or second control lever (16), is arranged in the transport position (P1) and/or the tilt position (P2) in a top dead centre position forming a locking position.
