Abstract (en)

[origin: WO2021043666A1] The invention relates to an actuation device (3) for installing on a vehicle part (2), in particular in the form of a door or a hatch, having an electric switch means (30) with at least one switch element (31) for initiating a vehicle function and having a housing unit (10) with at least one first and second housing section (11, 12), wherein the second housing section (12) can be moved from a rest position (I) into an actuation position (II) at least in some regions relative to the first housing section (11) in order to actuate the switch element (31). The invention additionally relates to a vehicle (1) and to an actuation method (100).
