Abstract (en)  
[origin: WO2021043575A1] In order to achieve a high level of efficiency, the invention proposes a refrigeration-appliance unit (58), in particular a domestic refrigeration-appliance unit, having an inner compartment (10), which forms a storage space (12) for articles and which is made up at least of a first inner-compartment part (14) and at least of a second inner-compartment part (16), which is adjacent to the first inner-compartment part (14) and is formed separately from the first inner-compartment part (14), and having at least one prefabricated, in particular at least substantially panel-like, thermal insulation element (18), which is fastened on at least one side (20, 22, 24, 26, 28, 30) of the inner compartment (10), said side being directed away from the storage space (12).
