Abstract (en)

[origin: WO2021043500A1] Method for operating a control unit for an exhaust gas probe, in particular for a wideband lambda probe for an internal combustion engine in particular of a motor vehicle, the control unit being designed to electrically control the exhaust gas probe, the control unit being implemented in particular in the form of an application-specific integrated circuit, ASIC, wherein the method comprises: allocating control data for operation of the control unit and/or the exhaust gas probe by means of a computing device, receiving operating data that characterize the operation of the control unit and/or the exhaust gas probe by means of the computing device.
