Abstract (en)
[origin: WO2021044087A1] Electronic piano comprising a housing (1), a keyboard (7) comprising a plurality of mechanically actuated keys, and a loudspeaker (6) able to generate acoustic vibrations, which are at least partially received in said housing (1), said piano being characterized in that it further comprises a vibrational transfer member (2) able to transfer the vibrations emitted by the loudspeaker (6) toward the keyboard (7), this vibrational transfer member (2) comprising a front transverse zone, intended for supporting the keyboard, and a rear transverse zone intended to accommodate the loudspeaker (6), said front and rear zones respectively being connected to one another in such a way that at least a substantial proportion of the vibrations generated by the loudspeaker (6), in the region of the rear zone, are transmitted toward the keyboard (7) situated in the front zone.
