Abstract (en)

[origin: WO2021043878A1] The invention relates to a ferroelectric, which has a piezoelectric material having a hafnium proportion of 2% or less, to the use of a ferroelectric of this type in energy generation and for implementation in memory, processor and sensor technologies, to the use of a ferroelectric, in which use energy demand is lowered by superconductivity, and to a method for producing a ferroelectric, in which method a sintering method is used.
