Abstract (en)
[origin: WO2021043910A1] The invention relates to a connection expansion module (2) for a component (1) of a lighting system, having a securing means (22..25, 29) for securing the connection expansion module to the component, at least one contact element (7..10) for contacting an electric connection (L, N, S1, S2) of the component (1), and multiple connections (12..19) connected to the contact element (7..10) in order to connect electric lines to the connection expansion module (2).
