Abstract (en)
[origin: WO2021043490A1] The invention relates to a method comprising setting up a connection between a first application on a first device and a communication service on the first device using an identification which is assigned to a second application, setting up a connection between the second application, which is executed on a second device, and the communication service using the identification, setting up a communication channel between the first application and the second application via the communication service and receiving, by the second application, a first message from the first application, the first message designating a third application to be executed on the second device and/or a first service of the third application to be executed on the second device.
