Abstract (en)

An electronic device (100) is described. The electronic device (100) comprises a main body (106) extending along a longitudinal axis which is parallel to a ground (202) that the electronic device (100) is standing on. The main body (106) comprises one or more speaker drivers (108) for rendering an audio signal, wherein the one or more speaker drivers (108) are at least partially oriented towards the ground (202). The electronic device (100) further comprises one or more feet (105, 111) extending downwards from the main body (106) and configured to hold the main body (106) elevated at an elevation distance (203) from the ground (202).
