Abstract (en)
[origin: WO2021048305A1] The present invention relates to the use of at least one fatty acid, advantageously volatile and odorous, selected from the group comprising propionic acid, butyric acid and/or a derivative thereof as a repellent active principle and/or for controlling the reproduction of brachycera, and to the use of an, in particular phytosanitary, composition comprising at least one fatty acid, advantageously volatile and odorous, selected from the group comprising propionic acid, butyric acid and/or a derivative thereof as a repellent active principle and/or for controlling the reproduction of brachycera advantageously by olfaction, and non-insecticidal. The present invention can be used in the agricultural, veterinary and phytosanitary fields.
