Abstract (en)

[origin: WO2021048495A1] The invention relates to a cooling module (22) for a motor vehicle, preferably having an electric motor, comprising: - at least one heat exchanger (24, 26, 28), - at least one tangential turbomachine (30) capable of creating a flow of air in contact with said at least one heat exchanger (24, 26, 28), and - a fairing (40) for housing said at least one heat exchanger (24, 26, 28), wherein the fairing (40) comprises at least one indentation (34-1, 34-2, 36-1, 36-2, 38-1, 38-2) for retaining at least one heat exchanger.
