Abstract (en)

[origin: WO2021048169A1] The invention relates to an adjusting device for adjusting an adjusting shaft (1), comprising an electric drive (2) that is coupled to the adjusting shaft (1) via a step-up gear unit, which is provided in the form of a harmonic drive. Furthermore, the invention relates to the use of an adjusting device for the axle drive of a robot, for the drive of a flight simulator, for tracking an antenna, for a dynamic steering of a motor vehicle, or for driving a printing machine. The invention additionally relates to a vehicle transmission comprising an adjusting device.
