Abstract (en)
[origin: WO2021048369A1] The invention relates to a lock system for a firearm, comprising an assembly consisting of at least two lever arms, wherein the lever arms are connected to an axle or a shaft in an articulated manner in the form of a toggle lever, and the toggle lever formed in this manner can be pivoted on both sides of a dead center in which the assembly is maximally extended. One of the lever arms is designed as a firing piece for a firing pin.
