Abstract (en)
A vapour generating article comprising: a body having a first end and a second end opposite the first end, the body arranged to contain a vapour generating material; a filter comprising a mouthpiece end and an attachment end opposite the mouthpiece end, the attachment end arranged to be attached to the first end of the body; an airflow passageway within the filter configured to allow a vapour to flow into the filter through the attachment end from the first end of the body and out of the filter through the mouthpiece end; a restrictor arranged to adjust the cross sectional area of the air flow passageway to alter the pressure of the air flow within the airflow passageway.
