Abstract (en)

[origin: WO2021054910A1] The present invention is a heating apparatus having a heat transfer base for transferring heat to a tobacco chamber (201) of a hookah (10) comprising tobacco chamber (201) for placement of tobacco, and lateral walls (112) which extend from said heat transfer base and which encircle a heating volume. Accordingly, the subject matter heating apparatus is characterized by comprising a front opening (114) provided on one of said lateral walls (112), and an electrical heater (120) having a resistive heater body (110) for being inserted to the heating volume through said front opening (114) and a power transfer cable (123) which is electrically connected to said heater body (110).
