Abstract (en)

[origin: WO2021052720A1] The present invention relates to a method for dyeing keratinous material, in particular human hair, comprising the following steps: applying an agent (a) to the keratinous material, said agent (a) containing at least one organosilicon compound (a1) and applying an agent (b) to the keratinous material, said agent (b) containing: (b1) at least one dyeing compound comprising at least one effect pigment comprising α) a substrate platelet comprising synthetic mica, and β) a coating comprising at least one first metal oxide (hydrate) layer, and (b2) at least one film-forming polymer. The invention also relates to a multi-component packaging unit which contains the two agents (a) and (b) in two separately fabricated containers.
