Abstract (en)
[origin: WO2021053296A1] The invention relates to a rubber composition containing a reinforcing filler, a crosslinking system and more than 50 to 100 phr of an elastomer that is an ethylene copolymer and of a 1,3-diene $\text{CH}_2=\text{CR}-\text{CH}=\text{CH}_2$, the symbol R representing a hydrocarbon chain having 3 to 20 carbon atoms. The aforementioned rubber composition provides a good compromise between the properties of rigidity and hysteresis.
