Abstract (en)

[origin: WO2021052687A1] The invention relates to a drive assembly (1) for a motor vehicle, comprising an internal combustion engine (2), an electrical machine (4) and a transmission (5). The transmission (5) comprises a clutch device (6) having a clutch input (7). The clutch input (7) is connected, with respect to driving, to the internal combustion engine (2) and to the electrical machine (4). The internal combustion engine (2) and the transmission (5) are arranged substantially coaxially along a central axis (8). The electrical machine (4) is arranged substantially parallel to the central axis (8) on a side of the clutch device (6) facing away from the internal combustion engine (2).
