Abstract (en)
[origin: WO2021052789A1] The invention relates to an inspection flap (1) for drywalls and ceilings comprising a frame (2) in which a door leaf (14) is moveably, in particular rotatably secured by one or more door hinges (15, 16), wherein the door leaf (14) has a first locking means and a second locking means, wherein the second locking means has at least one pivot handle (22) acting in a latch-type manner, characterised in that the first locking means is designed as a bar (20) acting in a bolt-type manner, wherein the bar (20) can be actuated preferably by a tool or a key.
