Abstract (en)  
[origin: WO2021058701A1] The invention relates to a method (500) for calculating personalised values of parameters of a new made-to-measure sole with a view to designing made-to-measure soles, said method comprising: - a step (530) of loading values of posture or mobility parameters (101) of a user; - a step (540) of loading values of shoe parameters (201); - a step (550) of calculating one or more personalised values of parameters (301) of a new made-to-measure sole.
