Abstract (en)
[origin: WO2021058364A1] The invention relates to a domestic dishwashing machine (1) having a washing container (2), a door (3) that is pivotally mounted on the washing container (2), a door opening and closing device (17) for the automated opening and closing of the door (3), and a control unit (31) for controlling the door opening and closing device (17), wherein the control unit (31) is designed to detect a motor current (I) of a drive element (20) of the door opening and closing device (17) and to determine whether the door opening and closing device (17) is functional or non-functional.
