Abstract (en)
   [origin: WO2021058047A1] The invention relates to a hybrid drive train (1) for a motor vehicle comprising: a drive unit (2) having an internal combustion engine (3), an electric machine (5) and a separating clutch (6) operatively arranged between same; a transmission; and a hydrodynamic torque converter (35) arranged between the transmission and the drive unit (2). In order to advantageously further develop a hybrid drive train (1) of this type, at least one torsional vibration absorber (19) is arranged between the internal combustion engine (3) and a converter housing (34) of the torque converter (35).
