Abstract (en)

[origin: WO2021058559A1] The invention relates to the packaging of compressed bales (1) with packaging (11) surrounding the compressed bale (1), wherein the compressed bale (1) is formed from highly compressed, preferably short-cut, textile fibres and has mutually opposite pressing sides (5, 6), which are acted upon by a pressing means (32) in a pressing direction (10), and circumferential sides (7, 8), which are arranged between the pressing sides (5, 6). The packaging (11) has multipart film packaging (12) resting on the bale body (4) and first strapping (22) with a plurality of parallel endless bands (23) that are laid over the pressing sides (5, 6) of the compressed bale (1). Further strapping (25) having a plurality of, in particular two, endless strapping bands (26, 27) are applied to the compressed bale (1), said strapping bands (26, 27) being laid peripherally only over the circumferential sides (7, 8) and being arranged externally on the film packaging (12) and on the bands (23), wherein the strapping bands (26, 27) cross the bands (23), forming cross strapping (21).
