Abstract (en)

[origin: WO2021104771A1] The present invention relates to a method (100) and a system (1) for monitoring the transport of transport goods (2), in particular items of luggage. In this case, a transport goods item (2) is marked with an RFID transponder (6) and the transport goods item (2) is captured (S3) during loading and/or transport of the transport goods item (2) on the basis of the RFID transponder (6). An item of transport information which characterizes the transport of the transport goods item (2) is determined (S4) on the basis of the capture (S3) of the transport goods item (2) and the determined transport information is output (S5).
