Abstract (en)

[origin: WO2021058398A1] The invention relates to heating elements (18) for a heating element carrier (10) of an electrically operated heat gun (100). The heating element carrier (10) is designed to receive the heating elements (18). The heating elements comprise a resistance wire (34) with a cross-sectional surface A and a cross-sectional perimeter U, where $(4 \pi A)U^2 < 1$.
