Abstract (en)
[origin: EP4035573A1] A modular rug system includes a plurality of rug elements (102,104) spaced apart from and connected to one another via a plurality of elongated fasteners (106). Each fastener connects two neighboring rug elements to one another. Each fastener has a first elongated component extending under a pair of neighboring rug elements, a second component disposed on a top surface of one of the pair of neighboring rug elements, and a third component disposed on a top surface of the other of the pair of rug elements. The top surfaces of neighboring rug elements are respectively recessed at defined locations in order to receive the second and third components of the fastener therein.
