Abstract (en)

[origin: WO2021180402A1] The invention relates to a printing machine having a device for detecting the presence of an application forme (87) on a forme cylinder (63), wherein the forme cylinder (63) has at least one cylinder channel (93), wherein at least one fastening system (64) for fastening the application forme (87) is arranged in the at least one cylinder channel (93), wherein the at least one fastening system (64) has at least one alignment element (89) for aligning an application forme (87), and wherein the at least one fastening system (64) has at least one sensor (100) which optically detects the presence of the application forme (87).
